

workshop
UNDERSTANDING THE TAXONOMY OF SOUTH AMERICAN LUPIN SPECIES

Dear colleagues

As a coordinator of the satellite workshop "Understanding the taxonomy of South American lupin species", I would like to update the agenda:

- Recognize the up today knowledge and the research under development in relation to resolve the taxonomy of the South American species of *Lupinus*. **FREE DISCUSSIONS**
- Point out the lack of information that still exists and the difficulties to understand the taxonomy and complete a total review of the genus. **FREE DISCUSSIONS**
- Establish the way of gathering and share information from herbarium specimens and live plants in different growing areas. **FREE DISCUSSIONS**
- Review of methodologies to approach and resolve the taxonomic problems. **FREE DISCUSSIONS**
- Review the strengths and weaknesses of each research group to afford the taxonomic study of the genus. **SHORT PRESENTATION BY EACH PARTICIPANTS**
- Establish links of communication and cooperative work between researchers working in different approaches to resolve the taxonomy of *Lupinus* and discuss possible application for research grants. **FREE DISCUSSIONS**

Given to the limited time (1:30 hs) for the workshop, and the large number of participants I propose that each one present his/her contribution in any of the following ways: 5 ppt slides, printed or digital ppt poster; flyer, leaflet or brochure.

I am looking forward to see you at the workshop.

Ana María Planchuelo
