Series of lectures and laboratory classes: "Functioning of plant genomes in relation to the environment – part II"			
No.	Topics/Date	Lecturer	
1.	Plant resistance to biotic stresses	Małgorzata Jędrzycka	
	2 h lectures		01.03.2022
	1h lecture + 1 h practical activities		15.03.2022
2.	Flexibility of Fusarium plant pathogens and their interactions with host organisms	Łukasz Stępień	
	2 h lectures		29.03.2022
	1h lecture + 1 h practical activities		12.04.2022
3.	Plant phenomics	Anetta Kuczyńska	
	2 h lectures		26.05.2022
	1h lecture + 1 h practical activities		07.06.2022
4.	Plant partners and pathogens - next-generation sequencing and phylogenomics of eukaryotic microorganisms	Grzegorz Koczyk	
	2 h lectures		10.05.2022
	1h lecture + 1 h Q&A session		24.05.2022
5.	Plant developmental responses to stress	Robert Malinowski	
	2 h lectures		21.06.2022
	1h lecture + 1 h practical activities		28.06.2022
6.	SUMMER EXAM	Lidia Błaszczuk	
	05.07.2022		

Doctoral seminars "Plant genetics part 8"
