IGR/ZP/066/10/2018

Poznan 15/10/2018

Participants in the proceeding

The Employer is providing the content of questions received from the Contractor with the responses to the inquiry for **NGS transcriptome sequencing services using Illumina and PacBio technology.**

Question 1

Will you accept the PacBio RS II platform?

Reply

The Employer will not accept the PacBio RS II platform.

Question 2

Will you accept the performance of 35,000 readings per trial

Reply

The Employer will not accept the performance of 35,000 readings per trial.

Question 3

Will you accept 30 million pairs of test readings on the Illumina HiSeq platform? If this is not enough, we can offer 60 million pairs of readings to the test.

Reply

The Employer does not allow the solution described above.

Question 4

Will you allow 35,000 readings at the assumed capacity of 500 Mb per trial? Is the assumed 7Gb yield per trial really necessary ?

Reply

In accordance with the answer to question No. 2. the Employer announces the offer inquiry to the subject of the contract, which he needs.

Question 5

Will you accept 30 million pairs of readings per trial on the Illumina HiSeq platform?

Reply

According to the answer to question No. 3

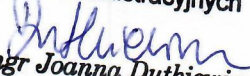

The Employer decided to postpone the deadline for submission of offers until 19/10/2018, until 12:00.

In relation to the above, point 8 of the Announcement is replaced by the following:

„The offer must be submitted in writing in person or by mail / courier until **19/10/2018, until 12:00** at the secretary's office of the Institute of Plant Genetics, Polish Academy of Sciences (room 124), 34 Strzeszynska street, 60-479 Poznan - on the attached Offer Form, in a sealed envelope with the note **"Response to a request for an RNA sequencing service"**

Other records of the Documentation remain unchanged.

The above answer should be considered when submitting offers.
