

We were saddened to learn about the death on April 24, 2023 of

Professor Bogdan Wolko

a long-time employee of the Institute of Plant Genetics, Polish Academy of Sciences, and its Director in the years 2012-2019, a committed researcher, educator of young scientists, member of the scientific councils of the Institutes of PAS, committees of the Departments of PAS as well as national and foreign scientific societies, honored with state decorations.

Professor has been associated with the Institute since 1995. As a molecular biologist, he studied legumes, especially peas, as well as wild and cultivated species of lupins. He had extensive contacts with scientists and breeders from Poland and abroad, cooperated with them in national and international projects. He was the author of numerous scientific publications, and promoted eight doctors.

We say goodbye to a distinguished Scientist, a kind Colleague and Friend.

The funeral will take place on May 22, 2023 at 12:00 at the Junikowo cemetery, Poznań.
